

OSW Equipment & Repair, Inc.

“The Soaker” Wheel Wash

High Volume- Low Pressure

The Soaker wheel wash is a high volume low pressure unit so high pressure water doesn't damage wheel seals, brakes or wiring harness'.

12' Wide Drive Thru

12' drive thru is the widest standard production unit on the market.

Aluminum Construction

The all aluminum construction is environmentally friendly and easy to handle . The Soaker will not rust or flake the paint.

The Soaker is a Legal Load

The Soaker is a legal load measuring in at 8'6" wide x 9'4" tall x 24' long and weighs 15,000lbs.

The exit can be rocked or paved once installed.

Once installed the exit can be paved after and sloped back to the wash to recover the excess water.

Custom Wheel Washes

OSW builds wheel washes to suit. We can customize a wheel wash to fit your requirements and specs for long term projects or permanent installs. .
